

AVS™ HARNESS

AVSHA1

FEATURES

1. Lightweight internal structure provides a stable platform to attach and support heavy loads
2. Rear plate attachment allows users to adjust plates vertically and attach different size plate bags
3. Elastic shock cord provides for horizontal adjustment and unrestricted chest expansion
4. Padded VELCRO® shoulders allows for quick and easy attachment of various sizes of front plate bags
5. Channel on back conceals optional release cable
6. Reinforced rear hardware lets user easily attach a wide range of side closure options
7. Padded side arm ensures comfort while allowing user to quickly slide pouches on and off
8. Full-length exterior side panel offers an additional closure method and provides an additional layer for attaching pouches
9. Interior is padded for comfort. VELCRO® sheet loop on inside allows for attaching pads or additional accessories

DESIGN

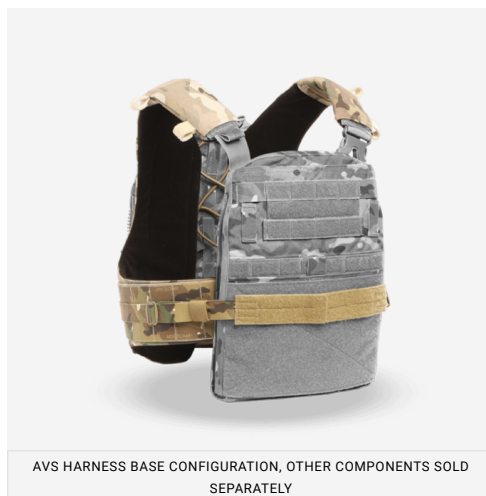

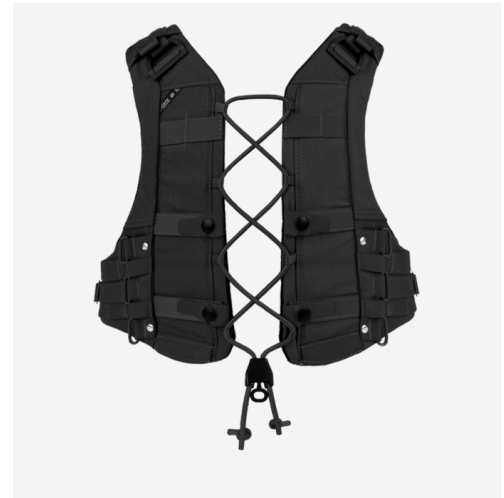

The AVS™ HARNESS is a primary base component of the AVS™. It provides structural support and a mounting platform for a variety of AVS™ components, which allows a wide range of different load-outs and configurations.
