DESIGN

The **AVS™ 1000 PACK** is a streamlined, lightweight assault pack designed to provide the user with a variety of access and attachment options. It can be configured as a standalone pack, a rear plate bag replacement, or attached directly to the plate carrier (or virtually any vest) to allow quick access without redundant pack straps. Made in US from US materials.

| Configuration | Description |
|-------------------|---|
| AVS™ Self-Access | Low-profile option that's well-suited for quickly accessing pack contents and easy don/doff |
| Fixed (Plate Bag) | Replaces the rear plate bag of either the AVS™ or JPC™ : accommodates all ESAPI and swimmer-cut plate sizes |
| AVS™ Semi-Fixed | Low-profile option for carrying items that don't require immediate access while retaining easy don/doff access |
| Standalone | Geared toward everyday use as a lightweight backpack |
| MOLLE-Attach | Allows the user to secure the pack to any PALS platform with a 4-stow by 6-row area available |
